TIME TO DISCOVER THEM IS RUNNING OUT

IT IS NOT TOO LATE TO TAKE ACTION!

AMAZING THINGS LIVE IN THE OCEAN!

Things you heard of or saw: 1%

Things you couldn’t even imagine existed: 99%

Yellow sea slugs

Fluorescent coral reefs

Etc …

BUT

INDEED

This phenomenon is called: OCEAN ACIDIFICATION

Ocean acidity is rising due to increasing CO₂ emissions absorbed by the ocean

Shells are slowly dissolving due to increasing acidity.

The global ecosystem is threatened …

… as well as food security & seafood production

However

Here is what you can do about it

Reduce your CO₂ emissions
